

Hi,
Please reject the NAB's petition 04-160. I live in a pretty isolated part of Montana and we have very few radio stations. They do not provide what I consider to be quality content. I spend a minimum of an hour in my car every day. The drive used to stress me out and make me very tired. Now that I have my XM radio, the drive seems to be much shorter and I am far more relaxed. Please don't limit the quality or content of their programming.

Thanks,
Kimberly Hockaday
